TITLE

MANUFACTURE, OF PREPREG AND

**CIRCUIT BOARD** 

(c)

(b)

(d)

(e)

ABSTRACT:

PROBLEM TO BE SOLVED: To provide a method of manufacturing a prepreg for a circult board or a circuit board used for various electronic equipments, wherein the circuit board of high quality where a through-hole is restrained from being clogged with foreign objects so as not to deteriorate it in electrical properties can be provided.

SOLUTION: Metal particles 7 which are formed of copper or silver or its alloy and 30 to 70 μm in grain diameter are scattered on the surface of the polyethylene terephthalate(PET) sheets 2a and 2b and inside a through-hole 3 so as to remove tailings 6 attached to the sheets 2a and 2b and the through-hole 3. Then, the tailings 6 are removed by squeegeeing with a square squeegee 8 which is formed of urethane rubber and of rubber hardness 70.
